Each of the eleven stamps in the series was printed using the offset method, in sheets of 50 (5 X 10) perforation 12, on unwatermarked paper, with no straight edge on any stamp. No plate numbers or marginal markings of any kind were applied. The plates were designed and crafted by workers at the Bureau of Posts in Manila. Gummed paper approx. .08mm in thickness was obtained from the United States prepared especially for the tropics with a medication making it distasteful to cockroaches and other paper-eating insects. The Palace issue was the first issue used in the Philippines to employ the 18c and 24c values.

The Official Printing information obtained from the Bureau of Printing:

Denomination	Sheets		Reserved	Destroyed	Delivered	Total Stamps
	Cut	Printed				
2c	12,060	11,976	14	101	11,861	593,050
4c	8,000	7,958	14	47	7,897	394,850
16c	4,152	4,102	7	20	4,075	203,750
18c	3,532	3,520	14	27	3,479	173,950
20c	3,532	3,517	14	29	3,474	173,700
24c	2,112	2,087	7	13	2,067	103,350
P1	248	236	7	7	221	11,050
Total	33,636	33,396	77	244	33,074	1,653,700

From the above totals, the 2c, 4c, 18c and 20c were overprinted with the word "OFFICIAL" in red, in the amounts listed above
