

131539

Raised Period after "B" (pos. 2)

131537

Raised Period after "B" (pos. 1)

SPACING VARIETIES

2mm

2.5mm

The standard spacing between the O and the B on these stamps is 3mm. This exhibitor discovered the 2mm variety and reported same in the Newsletter of the International Philippine Philatelic Society in 1999. The variety existed only on the Pos. 91 stamp found on the bottom left of a pane. Subsequently, this exhibitor discovered yet another variety with spacing in between the two - 2.5mm. Both varieties have since been confirmed with the location of two more examples of each.

Manila to United States, May 9, 1941. P1.92 pays 32 oz. First Class Rate
